

		Combu- rant	Inflam- ble	Corrosif Acide	Corrosif Base	Danger santé/ Toxique
						 
Oxidizers						
Flamm- ables						
Corrosive Acid						
Corrosive Base						
Health Hazard/ Toxic	 					

Not compatible	Store according to SDS Section 7 and 10	Compatible
----------------	---	------------

Note that two chemicals can have the same pictogram and still be incompatible!
 Example: Acetic acid and triethylamine are both flammable, but cannot be stored together because they are an acid and a base.

Explosive chemicals and compressed gases can not be stored with any other chemicals

Chemicals that ONLY have these pictograms can be stored outside of the ventilated storage area

Separate liquids from solids

In case of multiple hazard pictograms the following order should be considered
